Cloud Infrastructure Monitoring Report

THE BEST CLOUD INFRASTRUCTURE MONITORING PRODUCTS ACCORDING TO USERS

SUMMARY 2021

SUMMARY

Cloud infrastructure monitoring software allows companies to visualize and track the performance of their cloud applications and services. These tools aggregate data in real time to display information related to a company's cloud-based resources. These tools can track application performance, network availability, and resource allocation, among other cloud-related factors. They are typically used by IT departments to ensure services are functioning optimally and securely while also ensuring no money is being spent unnecessarily. See why users choose LogDNA to monitor their cloud infrastructure in this report.
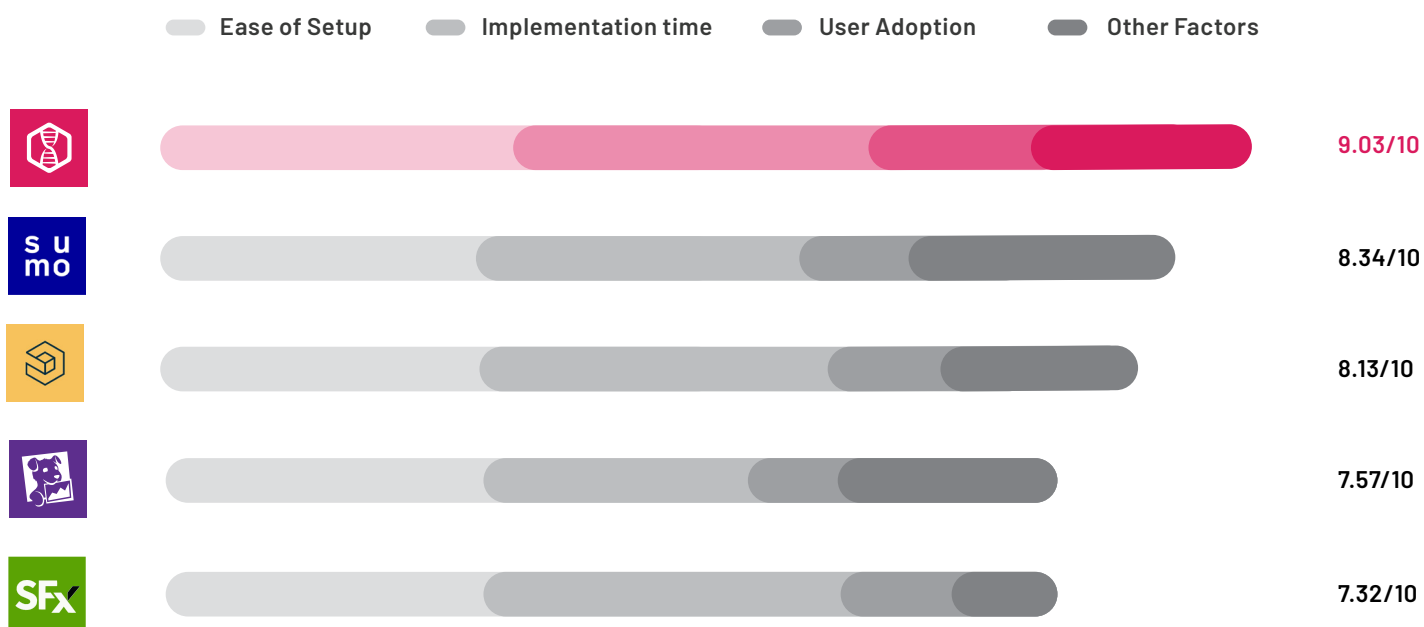

G2 is the world's largest tech marketplace where businesses can discover, review, and manage the technology they need to reach their potential. With G2, LogDNA users review the product and share their personal experiences. They are asked a series of questions that are standardized for all companies in the Cloud Infrastructure Monitoring category to get a holistic sense of how easy each product is to implement and use.

G2 rates products and sellers based on reviews gathered from their user community, as well as data aggregated from online sources and social networks. They apply a unique algorithm to this data to calculate the product's implementation score. The implementation score is affected by customer satisfaction, the amount of time (in months) to go live, user adoption, implementation method, and the number of reviews received on G2.

Ease of Setup   **Implementation time**   **User Adoption**   **Other Factors**

ABOUT LOGDNA

At LogDNA, everything starts with our mission: To help developers be more productive so they can focus on what they love. We are a mission-driven, developer-first company. This mission is simple, but bold. It guides everything that we've done since our founding 5 years ago. We focus on logging because logs are the lifeblood for developers — it is the core atomic unit for how modern engineering teams understand what's going on with their systems, monitor what they are doing, and get information they need to troubleshoot. Simply put, everything rests on your logs.

Sign up for a fully-featured 14-day trial and optimize your logging workflow or reach out to our sales team to create a plan tailored to your needs at outreach@logdna.com today.
